Click on [Move Cards]

To Merge a Complete Deck

In this exercise, we want to merge the flashcards and their history in the “Second 20 Nouns” Deck with those in the “Class Deck”.

Scroll Bar

Click the “Second 20 Nouns” in the list of available Decks.

Do a single-click on the top flashcard. Now move to the bottom of the flashcard list. While holding down the [Shift] key, click on the last flashcard.
(May need to use ‘scroll’ bar.)

The screenshot shows the Anki software interface. On the left is a sidebar with a list of decks, including "Second 20 Nouns". The main window displays a table of flashcards for the "Second 20 Nouns" deck. The table has columns for "Sort Field", "Card", "Due", and "Deck". The first card is "avtobus" with "Card 1" and a due date of 19. Below the table is a detailed view of the selected card, showing the Slovenian word "avtobus", its part of speech "samostalnik, M", pronunciation "[sound:avtobus.mp3]", the English translation "bus", and a picture of a blue bus.

Note that the Deck indicated in the flashcard list is now “Class Deck”. When you next look at the “Class Deck”, you will see your “Second 20 Nouns” flashcards in the “Class Deck”

Even though the far left column indicates the “Second 20 Nouns” Deck is showing, that Deck is now empty. The next time you request the “Second 20 Nouns” Deck – it will be empty.

Flashcard mergers can fail for a number of reasons. When a merge function is completed, there will be a message as to how many flashcards were actually merged of the total number requested – something like “5 of 12” cards were successful.

The most common reason for failure is that a card being merged already exists in a Deck. The reason for this is that Anki does NOT like duplicate cards. When two cards of the same word exists, Anki can not determine when schedule the next time for this word to be studied again based on previous activity – which is the basic power of Anki.

So for the most part, Anki allows unlimited moving a card between Decks but not copying the same word into two different decks. To prevent damage to your existing Decks, Anki will just skip the duplicate imported word and move on the next word being imported. If the words all exist in Anki already, you will get a message something like “0 of 20 new records successful”.
