

Getting Around Anki

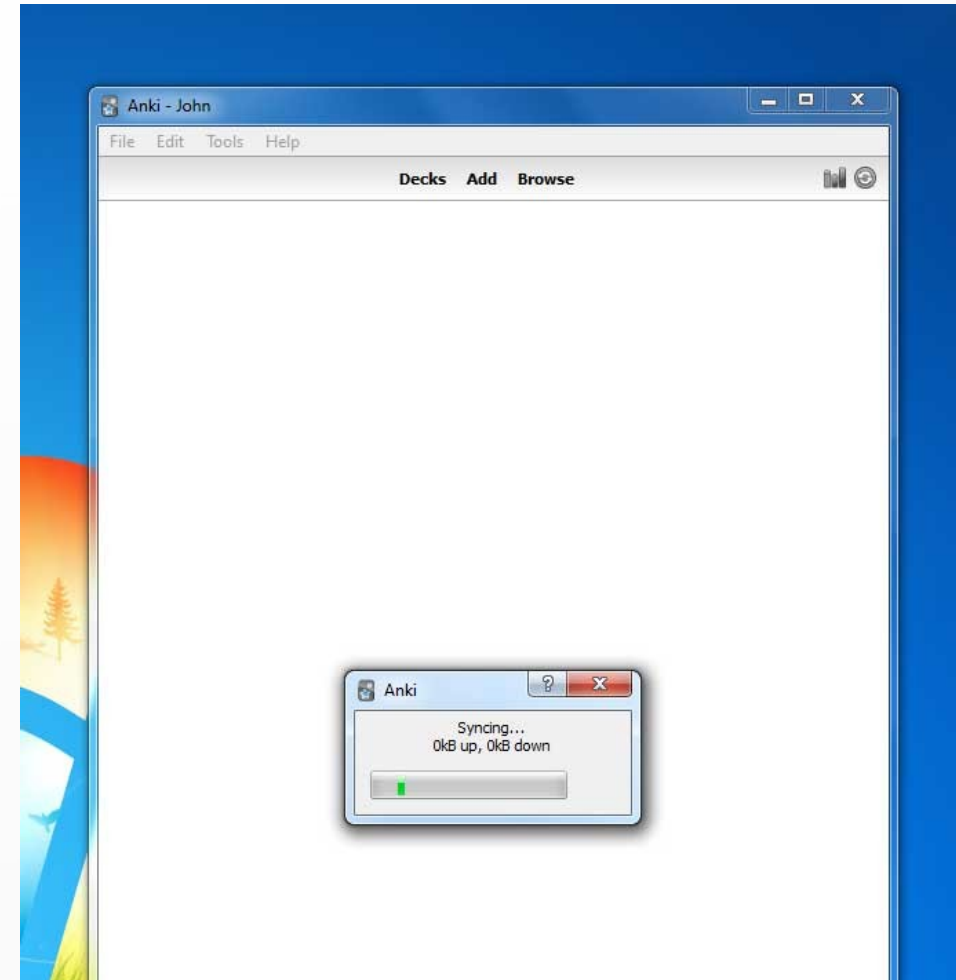

Slovenian Language Class 2020

Initial Screen – Look Fast!

The little 'Syncing' box will only appear if you have set up an AnkiWeb account.

Initial Screen Display

‘Decks’

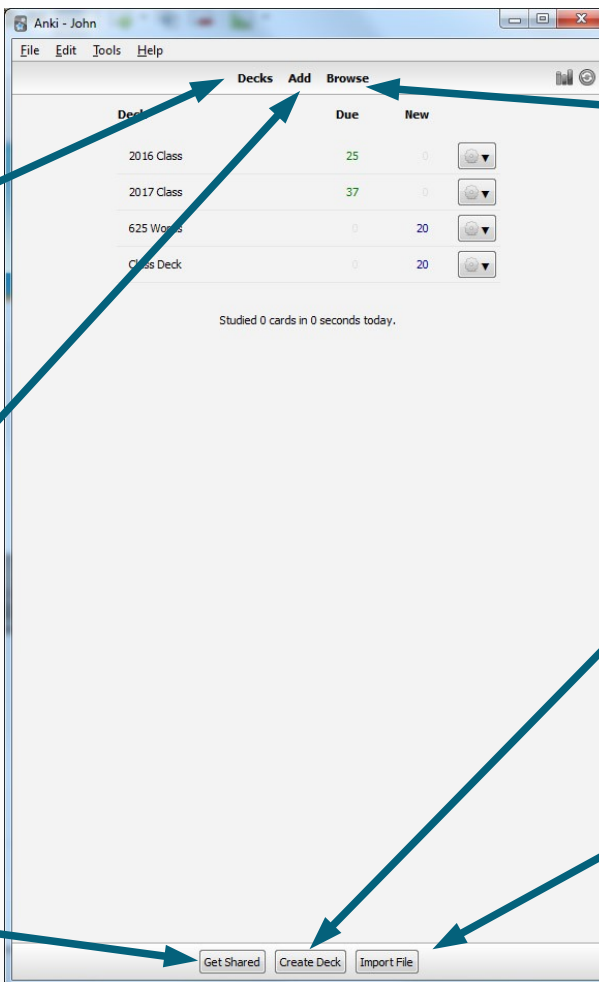

A list of Decks currently in your Anki program.

‘Add’

Make new cards for any of your current Decks.

‘Get Shared’

Not used at this time.

‘Browse’

Move ‘card(s)’ from one Deck to another, delete cards, and administrative tasks.

‘Create Deck’

Create a new deck.

‘Import File’

Import an Anki-based file.
(‘apkg’ suffice in file name.)

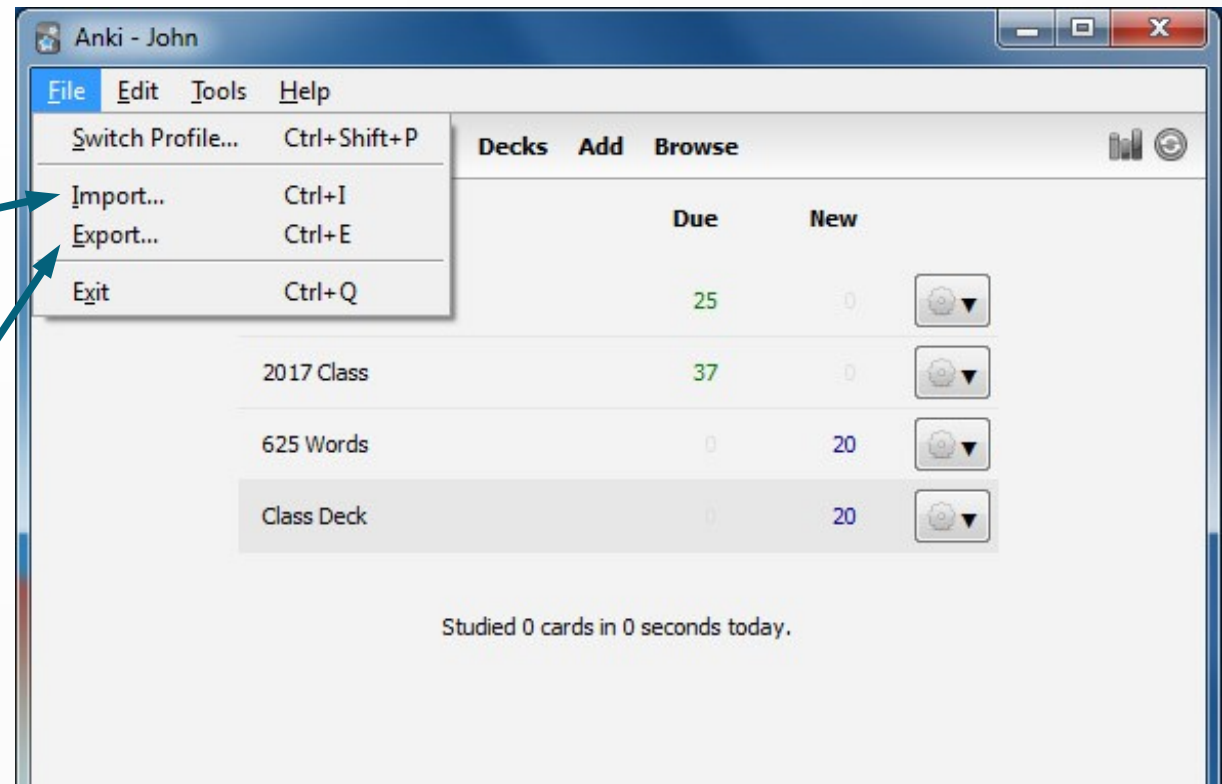

File Menu Items

‘Import’

Import data for Anki Decks from other Anki users or other programs.

‘Export’

Export data from Anki Decks to other Anki users or other programs using plain text.

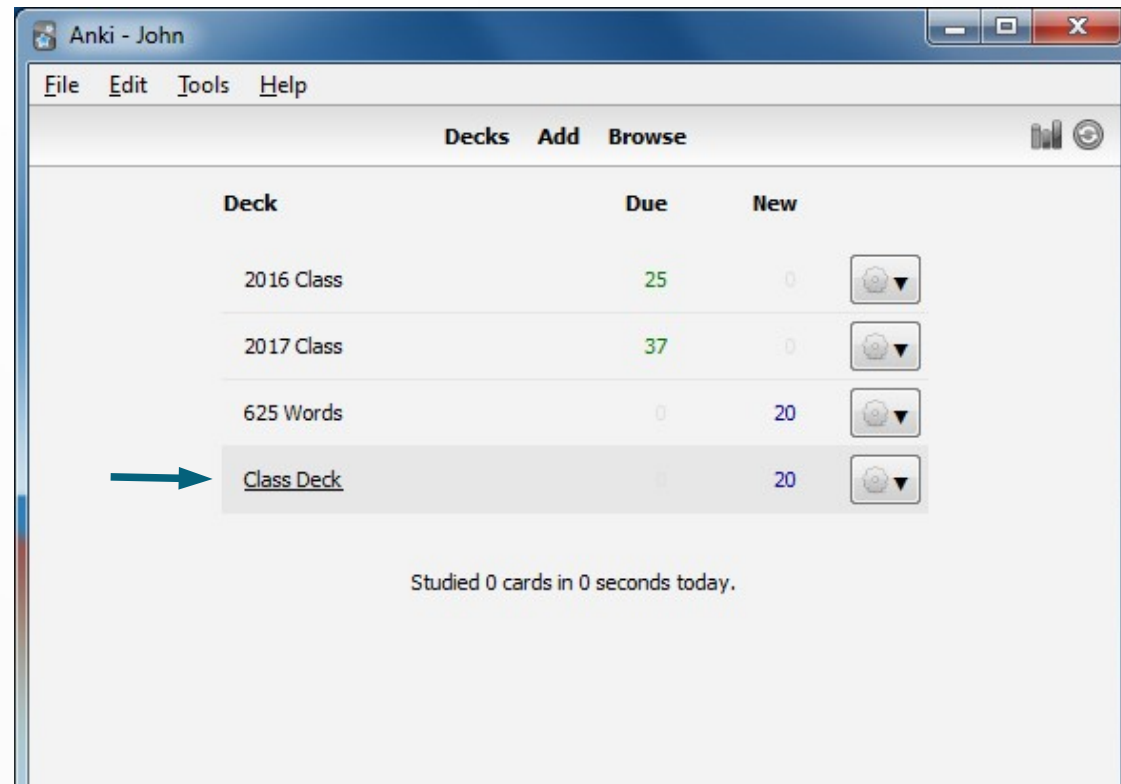

Let's Study!

Step 1 - -

Move cursor to the desired Deck ('Class Deck' in this case) and click once.

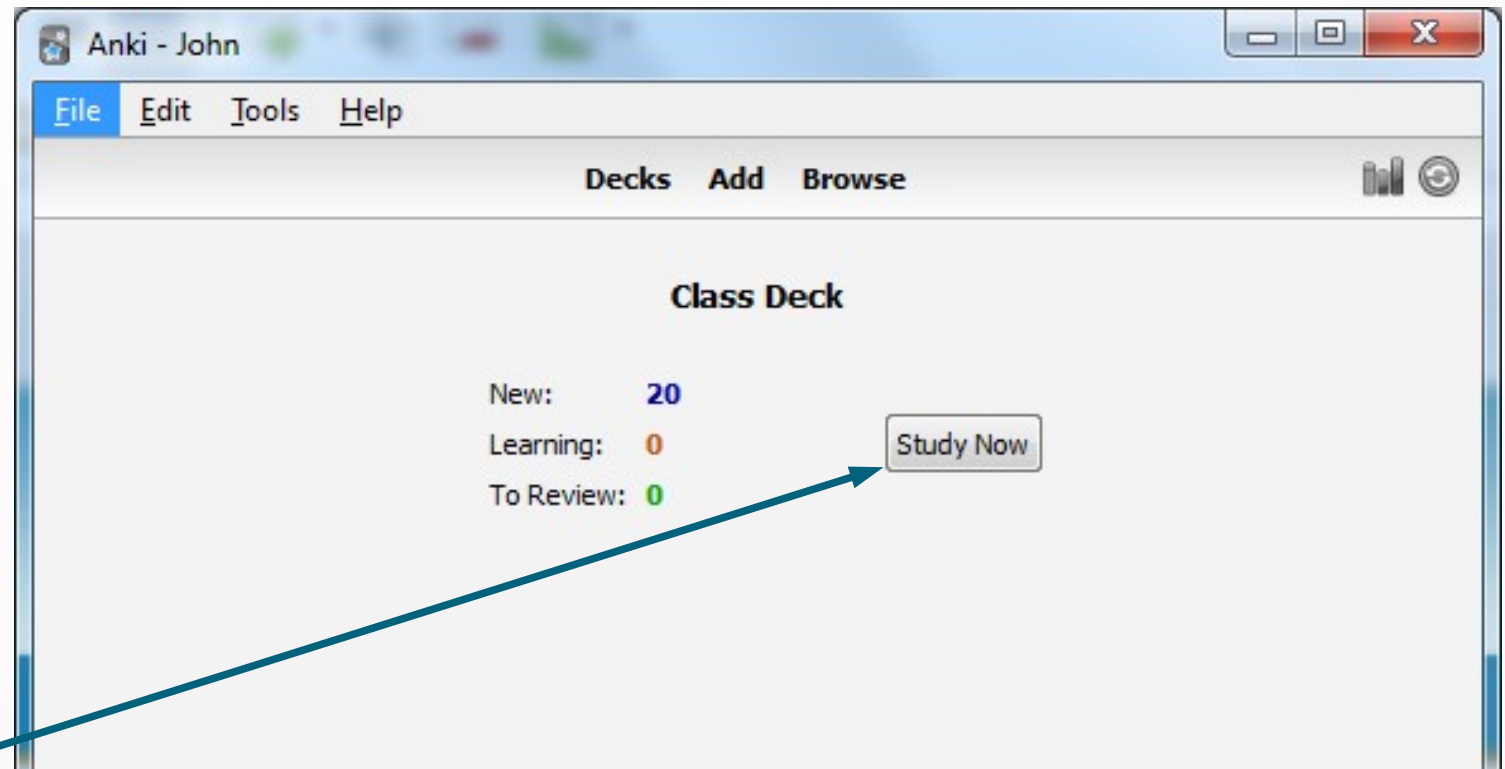

Study Statistics and Start

What this says it that 20 'New' words are in Queue and that none are being 'Learned' and that none are in the 'Review' status – IOW we have not started yet!

Step 2 –

Single-click on the 'Study Now' button.

Enter word that describes the image

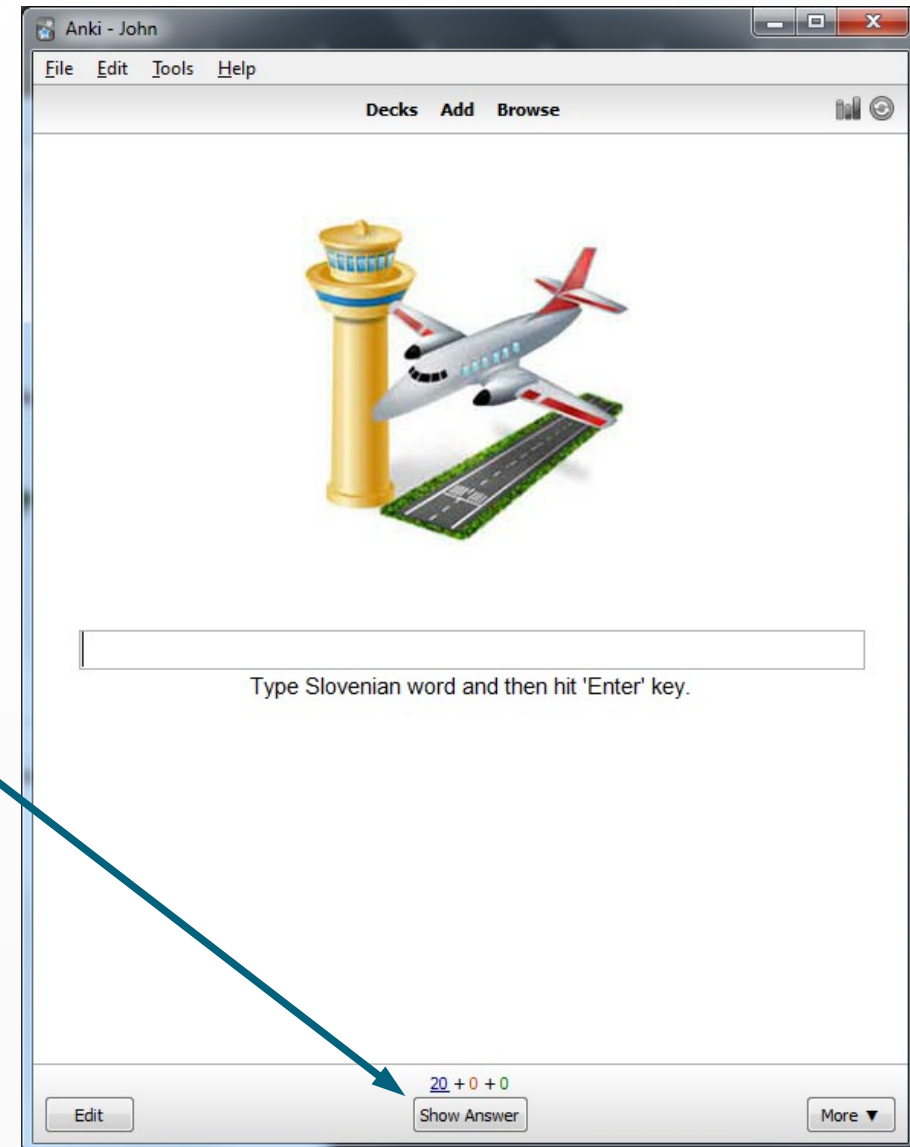

Step 3 - -

What's the Slovenian word for ...?

Three possible sources -

- You know the word (Best)
- You use Frank's list (Next Best)
- You 'push' the 'Show Answer' button (Worst)

Remember to hit the 'Enter Key' when done.

Complete Entry

Hit 'Enter' !

Correct answer response

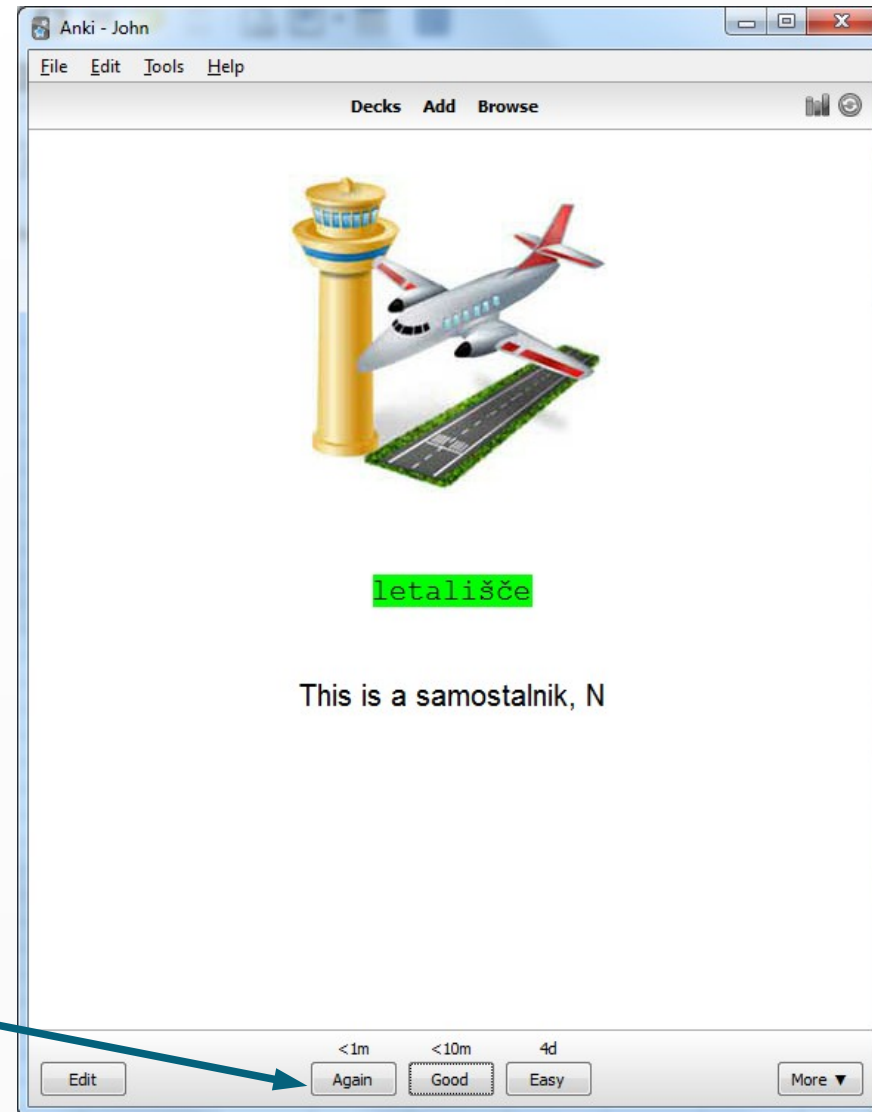

Ta Dah!!!! You got it right!

At this point, Anki will play the correct pronunciation audio.

Step 4 - -

Now with the greatest personal honesty – was this ‘tough’ [Again], ‘not bad’ [Good] or ‘Oh I knew that!’ [Easy]?

Select the appropriate button.

Not so correct answer response

Here Anki will show you what you Entered followed by the correct Answer.

Again, the correct pronunciation Audio clip will be played.

The personal level of confidence will still be needed via the buttons at the bottom of the display.

(It would seem plausible to select [Again] button in this case!)
